LUXURIOUS ELASTIC FLOORS

No limits in the cosmos for
REGUPOL infintium and
REGUPOL upscale.

**EXPERIENCE INFINITY
WITH REGUPOL
COMMERCIAL FLOORING**

REGUPOL COMMERCIAL FLOORING

Design and functionality for all the places you spend time.

Our Commercial Flooring floor coverings are specially developed to meet the high demands of sustainability and modern design. The deployment of **REGUPOL upscale** and our innovative **REGUPOL infintium** enables you to transform stores, libraries or a multiple variety of other spaces into distinctive places.

Whether warm shades for an inviting, cozy atmosphere or cool nuances for a clear, industrial character – combine your designs freely and create unique room experiences that inspire and endure.

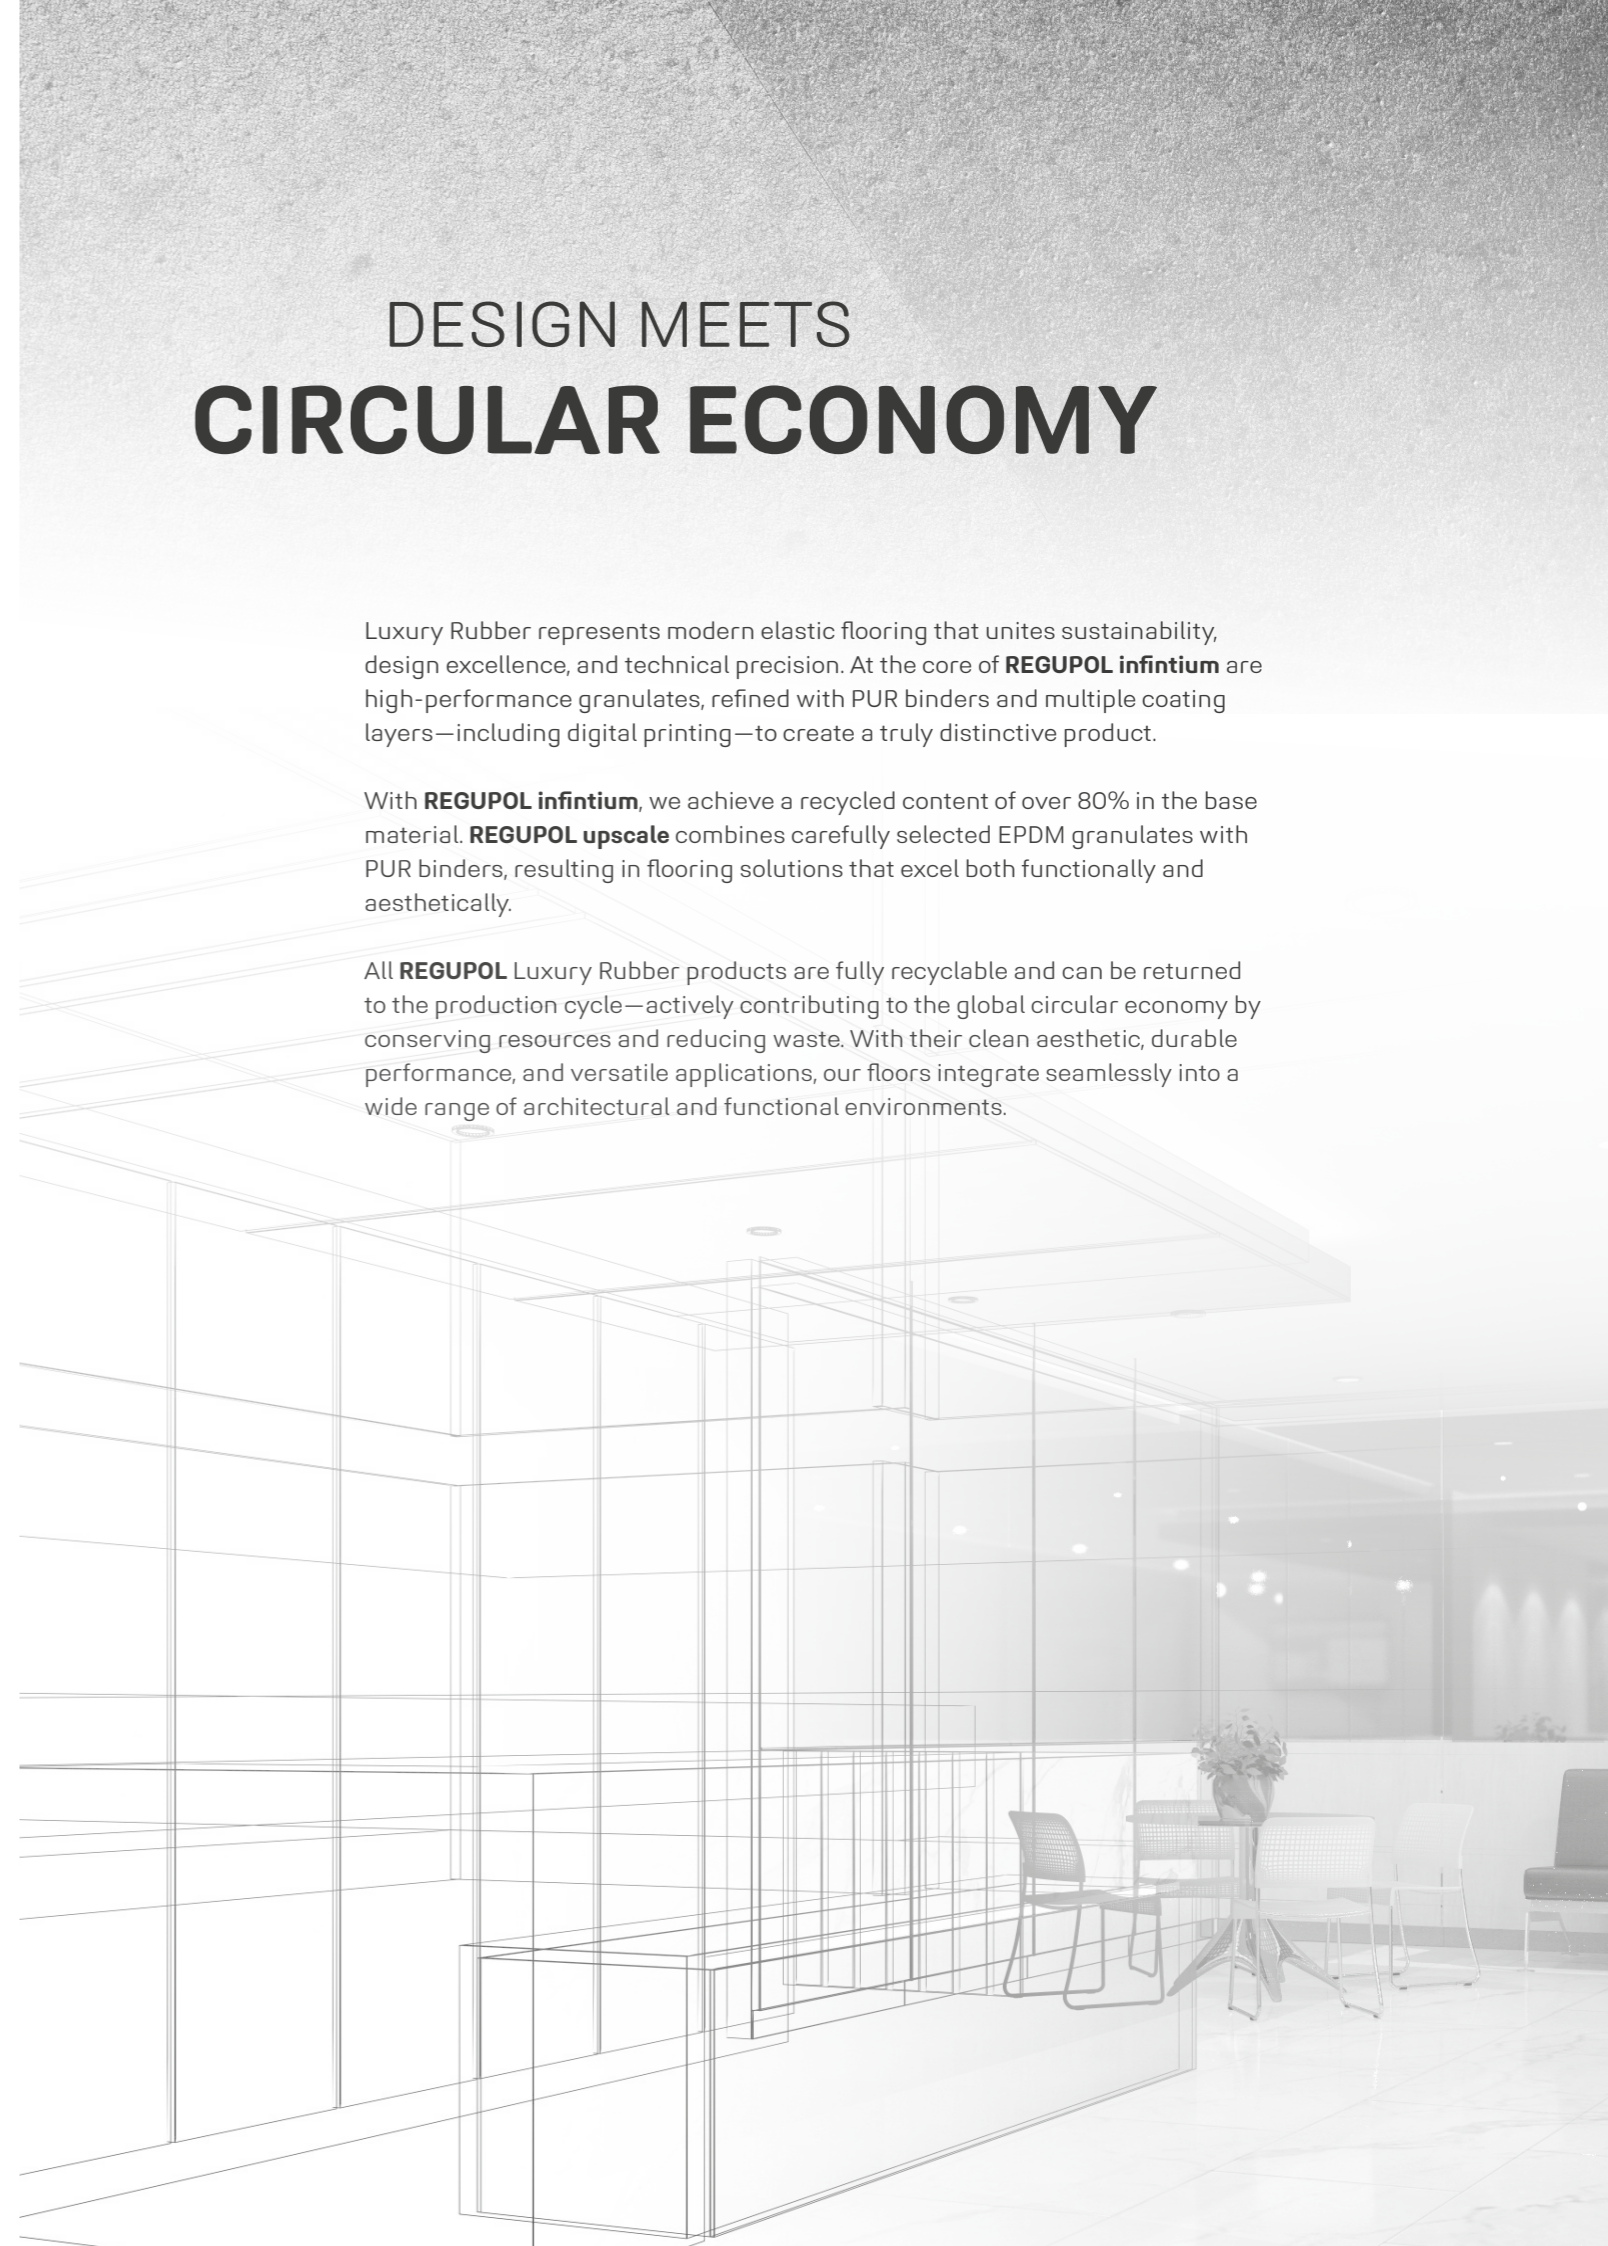

DESIGN MEETS CIRCULAR ECONOMY

Luxury Rubber represents modern elastic flooring that unites sustainability, design excellence, and technical precision. At the core of **REGUPOL infintium** are high-performance granulates, refined with PUR binders and multiple coating layers—including digital printing—to create a truly distinctive product.

With **REGUPOL infintium**, we achieve a recycled content of over 80% in the base material. **REGUPOL upscale** combines carefully selected EPDM granulates with PUR binders, resulting in flooring solutions that excel both functionally and aesthetically.

All **REGUPOL** Luxury Rubber products are fully recyclable and can be returned to the production cycle—actively contributing to the global circular economy by conserving resources and reducing waste. With their clean aesthetic, durable performance, and versatile applications, our floors integrate seamlessly into a wide range of architectural and functional environments.

BUILT FOR PERFORMANCE. ENGINEERED FOR RECYCLING.

The new commercial flooring solutions **REGUPOL infintium** and **REGUPOL upscale** are equipped on the reverse side with a specially developed performance fleece. This fleece plays a key role in the subsequent removal and recycling process.

A major challenge in recycling used flooring materials is the ability to return materials in a clean, single-grade stream. In practice, contamination frequently occurs due to screed or concrete residues, adhesive remnants, and other foreign matter. These contaminants complicate or even prevent high-quality material recovery.

To ensure controlled material separation, the performance fleece functions as a technical separation layer between the screed and the actual **REGUPOL** flooring. During later removal—after many years of use—the flooring system is completely detached from the subfloor. The fleece remains embedded in the adhesive bed, while the actual product can be removed cleanly.

This flooring construction enables significantly cleaner material recovery of the entire flooring system. As a result, the material can be removed without difficulty and efficiently recycled.

PERFORMANCE TODAY.
RESOURCE TOMORROW.

REGUPOL INFINTIUM

THE POWER TO GO BEYOND

REGUPOL infintium is an elastic and sustainable flooring solution for commercial applications. It is based on a 4 mm thick, PUR-bonded base layer made from high-performance granulates, which is multi-layer coated using a specialized process. Thanks to the integrated digital printing technology, the surface can be customized with a wide range of variable designs.

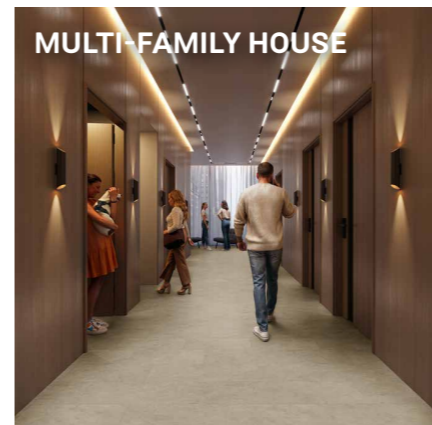

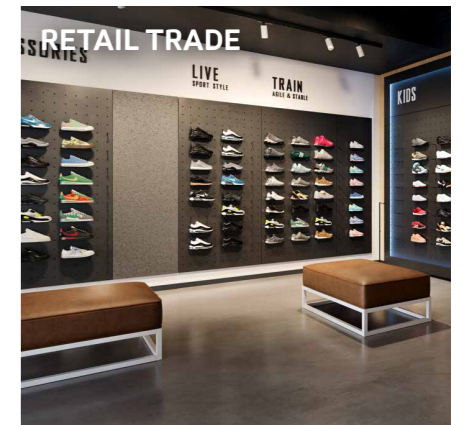

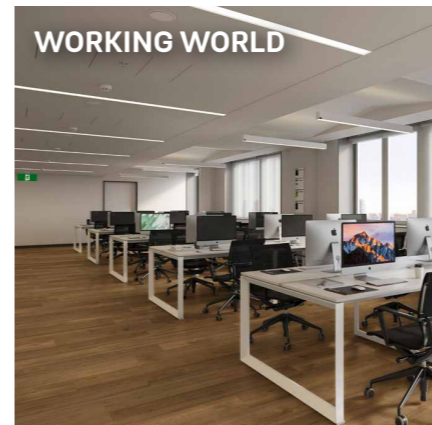

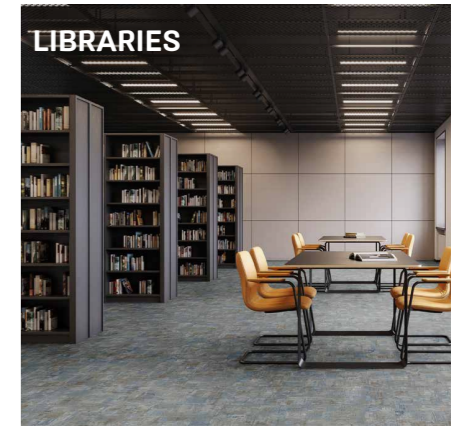

The flooring is elastic and comfortable, completely PVC-free, and fully removable and recyclable. It also stands out for its robustness and durability, offers extensive design flexibility, and allows for versatile installation. **REGUPOL infintium** is manufactured in Germany.

Available in planks (LRP®) and tiles (LRT®) – for harmonious surfaces or dynamic patterns.

REGUPOL INFINTIUM

APPLICATIONS

Made for rooms that live and have stories to tell. **REGUPOL infintium** adapts to the language of every room. Its precise surface blends harmoniously into architectural concepts – minimalist, expressive or timelessly elegant.

REGUPOL UPSCALE

INSPIRED BY NATURE,
DESIGNED FOR LIFE

REGUPOL upscale, a modern interpretation of a traditional classic. A real alternative to terrazzo floors, ceramic tiles and vinyl planks/tiles (LVP/LVT).

The luxurious collection of all-round beveled rubber planks (LRP®) comprises twelve neutral earth tones that can be harmoniously combined with one another to create warm, calming patterns. Be inspired by the variety of colours and textures and create your own personal touch. Mix and match to your heart's content or go for a monochrome look.

TESTIMONIALS

REGUPOL COMMERCIAL

The new **REGUPOL** flooring stands out for its exceptional sustainability, as it is fully recyclable and offers virtually unlimited design possibilities.

The 4 mm thick base layer made of high-performance granules, combined with a multi-layer coating, ensures high walking and standing comfort as well as pleasant elasticity. A special highlight is the integrated digital printing, which makes individual designs possible with virtually no limits.

Even under heavy use — such as constant exposure to work or safety shoes — the flooring proves to be extremely durable and resilient. Its modular availability as tiles and planks also allows for flexible installation patterns.

Especially in areas where people stand or walk for extended periods, the floor delivers noticeable ergonomic benefits thanks to its permanent elasticity.

Achim Höse, Sales Director Commercial Flooring bei **REGUPOL**

As an inter-company training center for metal and electrical professions, we are facing entirely new expectations today. Young people want modern, bright, and attractive learning and working environments.

We are completely satisfied with the new **REGUPOL** flooring. It has been installed in our training rooms, break area, and connecting hallway, and stands out especially for its pleasantly cushioned walking comfort — a clear improvement compared to traditional hard workshop flooring.

We were particularly impressed by the opportunity to select a design together with our trainees. This allowed us to create a solution that is both highly functional and visually appealing.

Andreas Kurth – Managing Director Bildungszentrum Wittgenstein GmbH

What excites me most is the enormous design flexibility of this flooring. Logos, corporate colors, and individual customer requirements can be seamlessly integrated. This creates solutions that are not only functional but also visually communicate a company's identity.

Elke Sondermann-Becker, Marketing Director bei **REGUPOL**
